1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Import Data using Transform Maps (Spreadsheet) project at the time of the release to User Acceptance Testing (UAT). The project imports employee data (Employee ID, Name, Email, Department, Location) from an external spreadsheet into ServiceNow using an Import Set staging table and a Transform Map. Employee ID is the unique identifier, so existing employees are updated and new employees are inserted as new records.

2. Defect Analysis

Enter verified counts from the Bug Tracking table once testing is complete.
